Ultimate Suite for Excel 2018.5.2254.9904 Crack [2019 2020] Top Downloads – Nov. 2, 2019Q: How to make a copy of an object using unetjoke.net? I'm playing around with the unetjoke python library, using it's "copy" command. >>> import unetjoke >>> player = unetjoke.Player() >>> player.insert('I am the player.') >>> player >>> player.copy() >>> player But if I try to loop the copy, it does not work: >>> player = unetjoke.Player() >>> for i in range(3): print(player) player.copy() I'm expecting to get 3 separate copies, of the same object... but instead get the same
